1. Advertisement of Committee Positions for 24/25.

- This is out opportunity to set up the society for next year and have a future impact. We need to make the committee as big as possible, so it's really important we go all-in!
- Emphasise in the advertisements how important the job is, and how fun it is!
- May be able to push out an advert in a popular 1st or 2nd year lecture.
- *We need someone to find out what the deadline is for this.*
- *Yuki needs to design recruitment graphics for it and Cameron needs to prepare a piece of text to encourage people to apply.*
 - e.g. Really good on your CV, great for the community, fun and eclectic work.

2. Integration Bee Finance

- Participants have received the money that Gunnar sponsored them for.
- We just need to get them the money that the organisers decided to contribute.
 - *Rebecca will send an email to SU to organise this.*

3. SU Website

- We decided to skip over this.

4. Matt Talking About Socials

- 1st Brewhouse one went well (the very first one).
- Pub Lecture went well.
- 2nd Brewhouse one didn't go well.
- Feedback from regular attendees:
 - Not enough notice for when socials are happening.
 - At least one weeks notice **hard rule**.
 - Not enough notice for us to plan it.
 - At least two weeks planning **hard rule**.
- Need to send out newsletters more frequently.
 - This takes a lot of time - so we either need to cut back on the content or get some help with it.
- Matt is gonna take over the newsletters now and they are going to be heavily simplified and purely list what events are happening.
- If we can't make it to a social, make it to a social anyway?
- Try and give notice if we've got something going on.
- Even if you bring a few mates along then that helps with numbers.
- We can rely on word of mouth a lot for the socials.
- Try and stand out a little bit with the content of the socials that we run, and really take into consideration when we go out as some nights will be busier than others.

5. Academic Co-ordinator

- Could do collabs between more "mathsy" societies like Chess Society for example.
- Main focus should be planning academic-based socials.
- *In fact, Braley is willing to help organise a Chess Soc X BUMS social.*

- *Email a bunch of maths lecturers that we enjoy their teaching and email them asking if they would be interested in doing a pub lecture.*

6. Socials

- Could combine the families social with the pub quiz.
- Matt wants to do a pub lecture in a couple weeks - *Braley to reach out to lecturers*
