

Turning the Microphones On/Off

- We have five microphones in the URB studio, but as current (September 2024 the far right, 'Guest 4 Mic' is out of action).
- They are controlled by the left soundboard, by the presenter chair.
- To turn them on, make sure the level is all the way at the top.
- Then, click the ON button at the bottom of each microphone to turn it on (see above for which microphone is which). To know a mic is on – the light in the middle of the desk will turn **on!**
- When you are in a song break, turn the microphone OFF to make sure your talking doesn't cut over the music.
- Note that no music will play through the speakers if any microphones are on – otherwise the mics will pick up the music and there will be reverb and playback and it will sound awful!
